

GUIDANCE NOTES FOR COMPLETION OF SCHIEDEL ISOKERN NOTICE PLATE

- Complete the Safety Information card using indelible ink. Refer to the guidance notes overleaf as to the type of information to be provided.
- Put the completed Safety Information card into the cover. To do this, lift back flap and place card face down on the inside of the heavy laminate cover. Position the card centrally between the four punched holes. Peel back the inner sheet and carefully seal the adhesive flap onto the back of the card by pressing down from the sealed strip to the other outer edges.
- Securely fix the Notice Plate in an unobtrusive, but obvious position within the building such as by the electricity consumer unit, water supply stop-cock or by the chimney/hearth described.

GUIDANCE NOTES FOR COMPLETION OF **SCHIEDEL ISOKERN** **CHECKLIST & NOTICE PLATE**

1. Property address, where work has been carried out:

Enter full address

2. Location of hearth, fireplace, chimney or flue:

State which room the hearth/flue/chimney is located.

3. State fuel:

Tick box/boxes indicating which types of fuel/fuels may be used.

4. Intended type of appliance:

Describe the intended type of appliance. If an open fire record the finished fireplace opening dimensions.

5. Chimney or flue construction:

(a) State the type or make and whether new or existing.

(b) Internal flue size:

Use the tick boxes to indicate the shape of the liner and record the internal dimensions on the notice plate.

(c) Confirm that flue liners/blocks are correctly jointed:

With socket end uppermost and state sealant used. If butt jointed collars must be used.

(d) Details of fire outlet terminal and diagram reference:

State which type of terminal has been fitted e.g. Clay Chimney Pot.

There are 3 diagrams referenced in Building Regulations ADJ referring to Solid Fuel appliances, Oil appliances and Gas appliances.

(e) Number and angle of bends:

Indicate total number of bends/offsets included in the flue.

(f) Provision for cleaning and recommended frequency:

Indicate provision for cleaning or if other state.

6. Ventilation provisions for the appliance:

Please refer to the appropriate Isokern instructions for the chosen firechest for air requirements. If you are creating your own firechest then the amount of free air required to the room containing the fire is 50% of the cross-sectional area of the flue. Note: DFE gas fire without throat or fire opening in excess of 500 x 500mm ventilation requirements as for solid fuel. Indicate number of rectangular hole air bricks required or state type and area of permanently open vents. For all other appliances, please refer to the current version of the Building Regs ADJ Section 2.

7. Hearth form of construction:

Tick if new or existing and state form of construction e.g. concrete floor slab/constructional hearth for superimposed hearth to be fitted.

8. Inspection and testing after completion carried out by:

State name and company details of person carrying out inspection and testing after completion.

Tests: tick appropriate box and include comments if needed.

9. Location of notice plate:

Tick box to indicate where the notice plate has been fitted or if other state.
